Adult Services Action Plan for the Learning Disability Plan

2014 – 2015

The Right Support

All care management staff will have training in person centred approaches

We will have a framework to help us buy support in the best way

We will check to make sure contracts for support have the same things in them as the LD Plan

We will work with the Partnership Board and the LIGs to think about how people with learning disabilities can check that support is really good.
we will work hard to make sure people have reviews of their support when they need them

Staying Healthy

We will have a social worker who will work with health to help move people out of hospital into the community.

We will work together with Southern Health in shared offices so we can get better at supporting people with complex needs together.

We will carry on working with the CCG’s to make sure people’s plans are funded and supported by the right people.
The Right Place to Live

We will provide information about all the different places people can live and the different types of support.

Care Managers will ask people about where they are living and help them think about any changes they might want to make in the future.

Contracts for support will make sure people are able to be part of their community.

We will look at where people are living now and what they might need in the future, we will share this with others who are working on housing.
We will make a guide that thinks about the housing needs of all people including people who have complex needs and we will share this others who are working on housing.

My Day

We will collect information at reviews, meetings events and with questionnaires to find out what people want to do and think about the best way to share this information.

We will make sure there are local information, advice and drop in sessions so people can plan what they do and be more independent.

We will put all the things we learnt from Launchpad into a report with actions and share this with the Partnership Board and the LIGs.
We will find out what was helpful to people from the travel training pilot at Totton College to help us find out how we can support people.

We will work with Day Service Providers and people who have learning disabilities to write some standards so we can check that the support provided is good.

**Relationships and Family**

We will use a new way of recording assessments and reviews which will help us make sure the important information is collected.

Care managers will make sure that everyone who is important is included in reviews and assessments, they will always check who needs to be invited.
We will find out what services are already available in the community to help people get support with their different relationships and share this with people.

**Being Safe**

We will make sure that people are supported to say what they think if there is a safeguarding issue.

We will work with the police and others to help them train their staff to understand how they can help people who have learning disabilities stay safe.

Care managers will have information about safe places and share this with people.
The Learning Disability Support Framework will make sure support is really good and people are involved in their community.

**Supporting Carers and Families**

We will work with Hantsdirect to make sure that information is clear and people know what help they can expect and when.

We will work together with Education, Health and Children’s Services to agree a plan for young people in transition.

We will work with the Community Independence Team to map what is available locally and tell carers how to find it.

We will make sure that we do what it says in the Care Act to support carers.
